Lab Activity 3

Instruction: Creating "Borang Maklumat Pelajar" Form

Objective: To create a HTML Form.

Instructions:

1. **Setup**:

   - Open your preferred code editor (e.g., Visual Studio Code, Sublime Text).

   - Create a new HTML file named borang_maklumat_pelajar.html.

2. **Reference**:

   - Refer to the attached "Borang Maklumat Pelajar" for the layout and fields required in the form.

3. **Form Structure**:

   - Create a basic HTML5 structure.

   - Add a <form> element with the necessary attributes.

4. **Form Fields**:

   - Use any 5 form tools (e.g., `<input>`, `<textarea>`, `<select>`, etc.) and refer to "Borang Maklumat Pelajar" for suitable fields.

5. **Submission:**

   - Save your file and ensure it is properly formatted.

   - Submit the HTML file to CIDOS for review.
